Product Description

NOTE: this product is for CURRENT model Trimmer Mowers. If you own an older Trimmer Mower, please call us to ensure you receive the correct hardware.

Cut brush and saplings up to 3 thick! The DR Trimmer / Mower equipped with the Beaver Blade will transform your machine into an amazing brush cutter on wheels--capable of cutting tough berry canes, brush, even hardwood trees up to 3 inches in diameter.

The Beaver Blade's patented circular chainsaw chain-in-groove design allows the chain to absorb some of the sudden shocks and stresses that can easily shatter a fixed-tooth brush blade, because the chain slips slightly in the groove when it hits obstacles. The weight of the machine is supported by the wheels, so there's far less chance for the blade to twist, bind, or kick back.

Please Note: The Beaver Blade should always be used with the Aluminum Mow-Ball Support.
