Product Description

STIHL BGA 60 Battery Handheld Blower

The most powerful battery-powered blower in the STIHL AK System, the BGA 60 blower provides 65% more blowing force than the BGA 57, while delivering a range of features for comfort and convenience. This premium homeowner blower is ideally suited for low-noise environments and easily stores with a convenient built-in hanging slot. A variable-speed trigger and boost mode help users clear grass clippings, leaves, and other yard debris from hard surfaces such as balconies, driveways, and sidewalks. A one-touch adjustable blower tube allows you to easily change the blower tube length to adjust to different heights and to permit access hard-to-reach areas. A metal ring on the blower nozzle provides protection against wear and creates a high-quality look. The BGA 60 comes ready for the STIHL Smart connector, so you can add a performance tracker that sends tool data to your smartphone or other device via Bluetooth® technology.
