### Product Description

## Redneck Blinds Platinum 360° Chair

### This Hunting Chair Makes Hunts Much More Enjoyable

Whether you are hunting in a Redneck Box Blind, our Soft-sided Ground Blind, or Hay Bale Blind, the Redneck Platinum 360° Hunting Chair is the ultimate way to hunt in comfort.

With the ability to fully rotate 360°, you can quickly and quietly make any shot necessary. With its adjustable legs and height, you can easily ensure your chair is leveled perfectly and set to your desired height.

The chair's mesh material ensures comfortable sitting for hours, while the chair's back can easily be folded when not in use. The chair also features adjustable armrests that can easily be moved out of the way while bow hunting to make for a smoother draw while shooting from the chair or can be folded down for added support while hunting with a crossbow or firearm.

The Platinum 360° Chair is strong, durable, and can support 350lbs thanks to its powder-coated steel design. The combination of quietness, comfort, and adjustability gives you the freedom to enjoy long hours in the field.
